CWRC SIDING APPLICATION & SELF-INSPECTION

Complete this page after the siding work is installed

PROPERTY ADDRESS

PPRBD PERMIT NUMBER

This application addresses Class 2 siding work affecting 25% or more of the exterior wall surface. BFFR determines the applicable project scope. Mark YES only for completed compliant work; explain NO or N/A responses.

SIDING SELF-INSPECTION

	YES	NO	N/A
The installed exterior wall covering meets the approved noncombustible, exterior fire-retardant-treated, or ignition-resistant material option. **CWRC 404.3.1.**	○	○	○
Wall-base and ground, deck, and roof intersections have the required flashing / protection. Exposed combustible sheathing is protected while drainage remains possible. **CWRC 404.3.2.**	○	○	○
Where BFFR includes the immediate 0-5 foot zone in the required scope, its noncombustible surface and vegetation requirements are complete. **CWRC 502.1.**	○	○	○

Bringing the rest of the home to current hardening standards is recommended for wildfire resilience; this recommendation is not an added permit condition.

I inspected the completed siding work and certify that these responses describe the installed condition. I have explained incomplete items below. BFFR inspection and approval remain required when applicable.
